-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In the above case, claim language is used for the abstract. Appropriate action is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al (U.S. Patent No. 4,722,336). Kim et al. discloses a device that is capable of functioning as an intramedullary nail drilling guide (Col. 1, lines 10-15), having a radiation device (86 and 88) including the source (86) and receptor (88), that yields a beam of radiation along an axis (Col. 8, lines 40-50). The device is also adjustably mounted (see Fig. 1 below) in a base (10), where it is adjustably attached (see Fig. 1 below).

Figure 1.

It is inherent that a drill must be movable towards and away to successfully drill a hole appropriate to an intramedullary nail. Further, the device for drilling is mounted on a guide rail (see Fig. 1), and the said device is mounted on a C-arm (see boxed area of Fig. 1 above). For claim 9, it is necessary that the invention as mentioned have a locking device to achieve the set drilling location.

### ***Claim Rejections - 35 USC § 103***

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al '336. Kim et al. does not expressly disclose a device wherein the said drill guide is both radio-opaque and radiolucent. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include such

materials as part of the invention, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.
